

WM.D.02.01 Information on Waste Management Services

1. Domestic Waste Collection

Our cleaners regularly empty the domestic waste bins in each room. To request for clearing of full bins or for more information you may contact the Khadamat Service Desk at 03-7138000 or servicedesk@khadamat.ae.

2. Recyclables Collection

Khadamat Waste Management Department facilitates the collection of recyclables for Paper, PET plastic, Aluminum Cans and Soft drinks glasses. For bulk of cartons and paper, our waste operatives are collecting upon request logged to Service Desk.

3. Provision of Recycling Bins

As best practice initiative, Khadamat Waste Management Department facilitates the provision of recycling receptacles for Paper, PET plastic and Aluminum Cans. To request provision of these bins or for more information you may contact Khadamat Service Desk at 03- 7138000 or servicedesk@khadamat.ae

4. Hazardous Waste Collection

- Biological Wastes

Biological waste generated after each laboratory activity should be disposed off to the big red bin lined with red bag or the small red bin lined with blue color waste bag pending for autoclaving. It should be autoclaved (if required) by University personnel and should be consolidated into the big red bin prior to disposal. A collection request shall then be logged through the Service Desk by sending the completely filled up Laboratory Waste Collection Request Form.

- Hazardous Solid Waste

Hazardous solid waste or solid waste contaminated should be disposed into the yellow bin. Laboratory Waste Collection Request Form should be completely filled up and send to Service Desk to facilitate collection.

- Hazardous Chemical Wastes (Solid, Liquid and other forms)

Hazardous chemical wastes will be collected by Khadamat in its original container e.g. glass bottle, plastic or can container. No decanting will be done and all collected chemical wastes will be disposed in its original state. To log a request please fill up the Waste Material Data Sheet and send to Khadamat Service Desk. It is mandatory that the relevant MSDS is supplied with the waste stream. For mixture of chemical, Laboratory Analysis Report shall be furnished from any ESMA accredited laboratories in the Emirates of Abu Dhabi.

- Laboratory Wares for Disposal

Hazardous broken laboratory wares such as test tubes contaminated with chemicals should be disposed off to the stainless steel container lined with yellow bag. Once the bins is 75% full, collection request should be logged to Service desk Laboratory wares contaminated with biological wastes should be autoclaved prior to disposal.

- Sharps/Syringe

Sharps such as syringes, blades and the likes should be disposed to the sharp container and once 75% full, collection request should be logged to Service desk. Laboratory Waste Collection Request Form shall be completely filled up and send to Service Desk to facilitate collection. Please refer to process flowchart in below link for reference

- Clinical Waste

Clinical waste collection request should be logged to Service Desk by filling out the Laboratory Waste Collection Request Form. Hazardous liners, bins and sharp container will be provided by the clinics staff.

- Cleaning of Hazardous Waste Bins

The Khadamat Waste Management team has a scheduled cleaning of hazardous waste bins. In case of immediate requirement for hazardous bin cleaning service, please log a request to Khadamat Service Desk at 03-7138000 or servicedesk@khadamat.ae

For any information on waste management, you may contact the Khadamat Service Desk at 03-7138000 or servicedesk@khadamat.ae
